OBJECTIVE

My objective is to pursue a challenging and growth-oriented career in an organization where I can utilize my knowledge and skills for creating value for organization and enhance my professional skills.

PROFESSIONAL SUMMARY

➢ 7.6 years of experience in development of Web & Enterprise applications using JAVA and J2EE technologies.

➢ Hands on experience in **Core Java, J2EE, Spring MVC, Spring Boot, Spring AOP, Hibernate, Servlets, JSP, Struts 2, JavaScript, Bootstrap, Angular JS, HTML 5, MongoDB, Webflux, Reactive, Mockito**.

➢ Cohesive team worker, having strong analytical, problem solving and interpersonal skills.

SKILLS

Programming Languages:

➢ JAVA,
➢ J2EE,
➢ C, C++

Web Technologies:

➢ Spring (DI, MVC, Boot, AOP, Webflux)
➢ Web Service (REST)
➢ Struts 2, AngularJS, Bootstrap
➢ JSP, HTML 5, JavaScript

Development Tools:

➢ Eclipse, STS
➢ WAS, Maven
➢ SQL Developer,
➢ Tomcat, RoboMongo

Database and ORM:

➢ MySQL, Oracle,
➢ Hibernate, JPA
➢ MongoDB

Version control/Issue Tracking:

➢ Git, RTC
➢ Bitbucket
➢ Jira, ServiceNow
➢ HP Quality Center

Other Technologies:

➢ Junit, Mockito, SonarQube
➢ Confluence
➢ Agile

EMPLOYMENT

Global Hitss, Sr. Java Developer, *Guadalajara, Mexico* (February 2019 - Present).

➢ Working as Sr. Java Developer for Esurance.
➢ Developing new policy services using Spring webflux, reactive API.

IBM Mexico, FullStack Java Developer, *Guadalajara, Mexico* (January 2019 – February 2019).

➢ Worked as FullStack Java Developer where I have used technologies like Java, SpringBoot, AngularJS.

Tata Consultancy Services, IT Analyst, *Kolkata, IN* (October 2012 – January 2019).

- ➢ Completed ILP(Initial Learning Program) (Oct. 2012 – Jan 2012)
- ➢ Designed, developed, enhanced and maintained various CITI bank applications l i k e :
  Add on Basic Card, One Time Password (OTP), Local InterCiti Transfer, Scheduled/Past payment history, User Registration, Login Help and many more.
- ➢ Being a member of NextGen team I have developed or migrated many applications of CITI Bank.
- ➢ Worked as Onshore lead from Java team of CITI LATAM Development.

MindTree Ltd, Intern, *Chennai IN* (Feb 12 – July 12)
- ➢ Developed a project that helps to locate an employee of that organization.

PROFESSIONAL TRAITS

- ➢ Willingness to work in team and hard worker.
- ➢ Ability to take responsibility.
- ➢ Disciplined & good etiquette.
- ➢ Attitude to continuously seek knowledge to enhance professional growth & performance.
- ➢ Good Problem-Solving ability.
- ➢ Good Analytical Ability to make systematic and rational judgments based on relevant information.
- ➢ Initiative/Pro-activeness.
- ➢ Focusing on discovering customer′s needs and finding out how to best meet them.

TECHNICAL EXPERIENCE

Project #1: Esurance – (Mexico) (Feb 2019- Present)

Description:
    Working as Sr. Java Developer for Esurance. This project is to implement different types of insurance policies of Esurance. For example, driver policy, vehicle policy, the application with get all the required details from the user of the required policy and check the eligibility. Writing Non-Blocking REST services using Webflux, Reactive API which are being used for different phase of a policy of an insurance.

Skills Used: Java, Spring Boot, Spring MVC, Spring Webflux, Reactive API, MongoDB, REST, Mockito, SonarQube, JUnit, WebTestClient.

Role Played: Sr. Java Developer

Responsibilities: As a Sr. Java Developer I am working on the followings:
- • Requirement gathering, analysis with business.
- • Preparing Functional Requirement Document and review it with business.
- • Knowledge gathering of the existing application functionalities.
- • Writing Non-Blocking REST services using **Spring Boot, Webflux, Reactive API.**
- • Delivering code in **BitBucket** in different branches using Git.
- • Attending daily status call to communicate with team.
- • Writing Unit and Integration test with **JUnit, Mockito, SonarQube**.
- • Fixing bugs, increasing code coverage.

Project #2: CITI LATAM Dev – OnShore (Mexico) (Sept 2017- Jan 2019)

Description:
     Worked as an Onshore lead of Java team for CITIBANK LATAM Countries Development. This project is to implement Citibank's new requirements for Latam countries like Colombia, Brazil, Nicaragua, El-Salvador etc.

Skills Used: Java, Spring Boot, Spring MVC, Hibernate, JPA, JQuery, JavaScript, HTML 5, Bootstrap CSS.
Role Played: Onshore Java Team Lead
Responsibilities: As a team-lead I have worked on the followings:

- Requirement gathering, analysis with business.
- Preparing Functional Requirement Document and review it with business.
- Getting knowledge of the existing application functionalities.
- Writing code and divide modules in offshore team members.
- Delivering code in RTC in different environments.
- Offshore Team management by doing daily status call.
- Deployment of the code in different environments DIT, SIT, UAT, Prod.
- Test the application with proper test plan document in DIT, SIT.
- Fixing bugs reported in UAT and getting signoffs from users.

Project #3: CITI Cards – NextGen (Jan 2016- Aug 2017)

Description:
     As CITI is moving into micro service concepts for its applications, this project is to migrate existing applications to new technologies. A new team is formed named NextGen to work on this activity.

Skills Used: Java, Spring Boot, Spring MVC, Hibernate, JPA, JQuery, JavaScript, HTML 5, Bootstrap CSS.
Role Played: Developer
Responsibilities: As a team member I have worked on the followings:

- Learning new technologies and building POCs on the same.
- Preparing design documents.
- Getting knowledge of the existing application functionalities.
- Writing those applications in new tech stacks from the scratch.
- Delivering code in RTC, bug fixing. Etc.

Project #4: CITI Bank Online (Jan 2012 – Dec 2015)

Description:
     This project is for developing a Citi Bank Global product which can be used in any region/country. It provides app-config files to configure the product as per business requirements. It provides rule configuration to insert business rules. It provides policy files to configure the interdictions.
     The products it delivers is basically a CITI bank web application, which provides banking solutions to its users. It provides a global product of a Citibank web portal application which can be consumed by any region depending upon their requirements.

Skills Used: Java, Struts 2, Spring Dependency Injection, JSP, JavaScript, JQuery.
Role Played: Developer, Backup Lead
Responsibilities: As a team member I have worked on the followings:

- Requirement analysis, upload requirement queries in clarification tracker.

- Preparing scope document and effort estimation.
- Preparing design document and get approval from the design lead, by explaining the proposed design.
- Preparing cookbook which will be used by the product user.
- Writing server-side codes by implementing exact business logics.
- Assigning works to the new comers and providing solutions to their issues.
- Finding bugs, fixing issues.
- Giving code review to development lead/design lead/onshore tech lead.
- Preparing test cases, reviewing test plan document prepared by the product testing team.
- Unit testing, Integration testing
- Giving KT to the new comers. Etc...

ACHIEVEMENTS

- ✓ Received 'On the Spot' award 4 times for great work.
- ✓ Received 'Best Team' award.
- ✓ Received 'Faculty award'.

ACADEMIC BACKGROUND

BANGALORE INSTITUTE OF TECHNOLOGY, *Bangalore, IN*
- ➢ Master of Computer Application (VTU 82%)

CYBER RESEARCH & TRAINING INSTITUTE*, IN*
- ➢ Bachelor of Computer Application (BU 74.4%)

BURDWAN TOWN SCHOOL (HS) *Burdwan, IN*
- ➢ Higher Secondary, Science (WBCHSE 65%)

BURDWAN TOWN SCHOOL (HS) *Burdwan, IN*
- ➢ Matriculation (WBBSE 76%)
